

Catwoman's Voices

Can **love** exist without music? Can music exist without **love**? Is it easier to fall in **love** through music? Is it simpler to create music when you are in **love**?

Love is the most topical theme in music at all times. It has different forms and messages: **love** as a romantic relationship, **love** for friends, children, parents, pets, country, and even food.

Latvian Voices, a cappella program **LOVE** IS..., explores this theme in music from the 16th century to the present day.

John Dowland's "Come Again", Pachelbel's "Canon in D", Purcell's "Dido's Lament", **love** stories from Latvian folk music, original **love** songs composed by the members of Latvian Voices, and world popular melodies from Sting, Peter Gabriel, and other vocal legends.
